Personal Restaurants Guide

—

Prof. Pawluk & Prof. Kiani

Description of the Project

Designing and building a Mobile (Android) Application, "Personal Restaurant Guide" that will help users to keep track of the restaurants they've visited, rate them and share using email.

- Application is a standalone application
- Runs on Android selected device.

Functionalities:

Personal Restaurant Guide Application

- Search restaurants based on name and tags

- Stores information about the restaurant

- Allows user to rate the restaurant

- Allows user to show the location of the restaurant on the map and get direction from current place

- Provides an option to share information about the restaurant using email
